§ 95.17 Processing security facility approval.

Following receipt of an acceptable request for security facility approval, NRC will perform an initial security survey of the licensee or other facility to determine that granting a security facility approval would be consistent with the national security. If NRC makes such a determination, security facility approval will be granted. However, NRC may determine that granting an interim security facility approval prior to an initial security survey would be consistent with the national security. If NRC makes such a determination, interim security facility approval will be granted and a security survey performed as soon thereafter as practical. As a result of the security survey, NRC may grant a security facility approval or may continue or terminate interim security facility approval pending compliance with survey recommendations or until an exemption is granted pursuant to § 95.11.

Some examples of minor, nonsubstantive changes to the facility security plan include:

(2) A revision to protective personnel patrol routine, provided the new routine continues to meet the minimum requirements of this part.
